National RTO Provider Number: 52413

UNCERTIFIED AERODROME COURSE

Course Overview

Our 1-day Uncertified Aerodrome Course is an abridged version of our 4-day Aerodrome Reporting Officer course.

This course focuses on serviceability inspection requirements at an uncertified aerodrome, safety best-practice, and maintaining the operational requirements of this category of aerodrome (where AROs are not required to be present). Advice provided by the Civil Aviation Advisory Publication (CAAP) 92-1 and best practice suggestions are embedded throughout the course.

Whilst training for the operation of Uncertified Aerodromes is not mandated, this course provides valuable introductory knowledge and skills that support the operation of the aerodrome and enhances aerodrome safety for those wishing to go beyond the minimum required standards.

Course content

- Types of Aerodromes
- Role and responsibilities of the ARO
- Aerodrome Regulation
- Aerodrome Serviceability Inspection Standards and Techniques
- Key Aerodrome Features
- Markers and Markings
