AIRCRAFT REFUELLING SAFETY COURSE

Course Overview

Our 1.5-day Aircraft Refuelling Safety course is specifically designed for businesses that operate their own private aviation fuelling facility and wish to train their staff in operating the facility in a safe manner, and in accordance with currency industry practices and standards.

AMS provides refuelling services at multiple sites across Australia. Our refuelling staff will provide practical training delivery in most aspects of small fuel facility management and quality control.

Site-Based Training Requirements

This course is offered as a site-based course only. It will be advantageous if the client can provide testing equipment for the practical component (hydrometer, density calculation wheel, thermometer, metal bucket, glass sample jar, SWDs, syringe, etc.), although this is not essential.

Suitable PPE for the course participants must be provided by the client.

Topics Covered

- PPE
- Manual Handling
- Product Knowledge
- Safety Quality Control Process
- Sampling and Testing
- Refuelling Equipment
- Emergency Equipment
- Basic Maintenance

Students are required to demonstrate practical skills and knowledge in guided practical scenarios during the course. This consists of verbal questioning and verification of knowledge and understanding.

Course Duration

This course is 1.5 days in duration. Day 1 is generally a training day, whereas Day 2 will be the practical component of the course.

Who Should Attend This Workshop?

This course is recommended for personnel who are responsible for performing fuel quality control checks at their facility.

Entry Requirements

There are no entry requirements for this workshop, however we recommend that participants already understand the operational requirements and issues that are relevant to their area of responsibility.

Post-Course Recommendation

Following this training it is strongly recommended that students are mentored in the workplace by a qualified and approved refueller prior to conducting any solo refuelling activities.

Maintaining Currency

In alignment with industry expectations and to ensure ongoing competency and currency AMS recommends that participants complete this course every two (2) years.

Certification

This course is not Nationally Recognised. A Certificate of Participation will be issued within 5-days of attending this course for your aerodrome training matrix.

Course Fees and Payment

A formalised quote will be provided upon request. As per our Fees and Refunds Policy (available on our website), we do not collect enrolment fees in advance for this course. Your invoice will be issued to you on the day of the course, payment will be required within 30 days in accordance with our T&Cs.

AMS reserves the right to withhold certification until payment has been made.
